

**The St George State School and St George State High School
Invite you to attend the launch of Stymie on 01 November 2022
at 5:30 pm at the St George State School Hall.**

It takes courage to say something.

Stymie empowers young people to speak up without fear and ask for help when they need support, or if they are seeing or experiencing harm.

Stymie provides online reporting for schools through encrypted, anonymous notifications that are delivered to authorised school staff.

Suicide ideation, discrimination, anxiety, depression, bullying, self-harm, physical fights, sexual assault, family violence and illegal activity can be reported using Stymie.

Stymie supports young people by developing the self-belief that they can #saysomething for themselves or as a bystander on behalf of someone else.

Stymie has worked with over 200 schools and more than 600 000 students since 2014.

Stymie saves and changes lives every single day.

Free sausage sizzle from 5pm!

Come along and learn how Stymie will work in our schools.
